

Prof. Rebeca Cerezo Menéndez

Dr. Cerezo started to work as FPI scholarship researcher to The ADIR Research Group in 2007 and teaches in the Department of Psychology at the University of Oviedo since 2010. Her research interests are focused on metacognition, self-regulation, and Educational Data Mining. She has transferred her work through a large number of projects, chapters, papers and international conferences. She is an active member of the AERA (The American Educational Research Association), EARLI (European Association for Research on Learning and Instruction) and SoLAR (The Society for

Learning Analytics Research). As well as this, she has worked at the University of Minho (Portugal), at the University of California at San Francisco, in the SMART Laboratory at McGill University (Canada), and the LATTE Lab at the Faculty of Engineering in the University of Sydney, as pre and post doctoral researcher and visiting professor. She currently supervises 6 doctoral thesis, two of them in Computer Engineer and is the managing editor of the JCR journal *Psicothema*.
