

Sandra Caeiro

PhD on Environmental Engineering at the New University of Lisbon (2004), Portugal. She is currently Assistant Professor in the Department of Science and Technology at Universidade Aberta (UAb), where she teaches in the field of environmental sciences and sustainability, and a senior researcher at CENSE - Center for Sustainability and Environmental Research from New University of Lisbon, Portugal. She is the coordinator at UAb of the European Virtual Seminar in Sustainable Development. Her main research interests include e-learning and environmental sciences tools and education for sustainability. She has mentored several post-graduate students and postdoctoral researchers, published papers in peer-review ISI journals, chapter books and international conference proceedings, and coordinated and participated in several research projects.
